

ABHISHEK BANSAL

Program Manager | Strategy & Operations

Bengaluru, Karnataka | +91-7974448330 | abhishek245370@gmail.com | [linkedin.com/in/theabhishekbansal](https://www.linkedin.com/in/theabhishekbansal) | theabhishekbansal.github.io

PROFESSIONAL SUMMARY

Program Manager with 5+ years in Strategy & Operations. Scaled partner-led revenue 2.5x+ and delivered ~₹1.25Cr in annual cost savings through tooling and process redesign at Teachmint. Known for owning ambiguous, cross-functional problems end-to-end — BRD to org-wide adoption — and for calling build-vs-buy and vendor decisions that leadership trusts.

PROFESSIONAL EXPERIENCE

Teachmint, Bengaluru

Feb 2022 – Present

Program Manager II (Apr 2025) | Program Manager I (Jul 2023) | Asst. Manager (Sep 2022) | Onboarding Associate (Feb 2022)

Founder's Office role on Teachmint's smart-board hardware business (~₹75K AOV) sold through 200+ partners to 1,500+ schools/universities; worked directly with Senior Director, VP/AVP and Leadership Team.

- **Partner-Led Revenue Growth:** Grew partner network revenue 2.5x+ in a 100% partner-led sales model; designed and launched the Partners Meet programme and incentive schemes driving 30% YoY growth across 200+ partners.
- **Order-to-Installation Platform:** Owned BRD-to-adoption for an end-to-end order processing, procurement, installation and training system on Zoho One/Creator — replacing manual, spreadsheet-based tracking with a structured system for serial-number and unit-level procurement, stock-in and QC categorisation. Achieved 5x order-processing efficiency with no headcount increase across 5k+ monthly orders (~3 hrs to under 30 min), giving leadership real-time visibility.
- **Zoho One Consolidation:** Led vendor evaluation and a 5-month org-wide migration from multiple fragmented tools to Zoho One across Order Management, Finance and Supply Chain; cut annual software spend from ₹1-1.25Cr to ₹25-35L (~₹75L-90L saved annually).
- **Tooling, AI & Automation Strategy:** Evaluated build-vs-buy for a real-time partner order-visibility tool ("Partner Hub") and recommended against building in-house after an ROI assessment; separately built AI agents on Zoho Creator using Claude and ChatGPT to automate manual reporting and status-tracking workflows, reducing manual effort and turnaround time.
- **Logistics, SLA & Service Recovery:** Raised SLA adherence from 70% to 90% in 6 months via automated real-time dispatch tracking (delivery time ~3 days); built full-visibility replacement tracking (0% to 100% on-system), saving ~₹50L and improving resolution turnaround.
- **Operating Cadence & Leadership:** Run MBRs and zonal reviews, author sales and partner policy, and led tool selection for automation and internal operations; built a dedicated international order management system alongside the GTM strategy for international market expansion (entry approach, policy, tracking dashboards); lead a team of 8 (3 direct reports).

Unacademy, Bengaluru

Jan 2021 – Jun 2021

Operations Specialist

- Mapped and streamlined cross-team operational workflows spanning sales, academic and support, sustaining 90% CSAT across stakeholders.
- Built KPI dashboards in LeadSquared and Looker Studio tracking demo-to-target performance, used directly in weekly executive reviews.

PlanetSpark, Gurugram

Jan 2020 – Oct 2020

Business Development Associate

- Owned the full sales cycle — prospecting to closure — while expanding the offering into international markets (UAE/Dubai), consistently exceeding monthly sales targets.
